Table of Contents

Future Food and Drinks Packaging

Executive Summary	10
The packaging market	10
Green packaging	11
Supply chain efficiency	12
Food safety packaging	13
Convenience	14
New materials	15
Conclusions	16
Chapter 1 The packaging market	18
Summary	18
Introduction	18
The packaging market	18
Market value and growth by geography	19
Market value and growth by packaging type	21
Plastic	22
Metal	24
Glass	28
Paper and board	30
Chapter 2 Green packaging	34
Summary	34
Introduction	35
Green packaging	35
Innovation and NPD	38
Category analysis	38
Regional analysis	41
Packaging material	43

Trends in green packaging	45
Recyclable materials, recycled materials and re-usable packaging	45
Recyclable materials	45
Recycling glass	46
Recycling plastic	47
Recycling metal	48
Recycling cardboard, paperboard and paper	48
Innovative recycling projects	49
Recycled food and drinks packaging	50
Re-usable packaging	52
Reduced/lightweight packaging	55
Packaging re-engineering	55
Switching from traditional materials to lighter alternatives	59
Biopolymers	61
Biopolymers	61
Compostable and biodegradable bioplastics	64
Bioplastics and recycling	65
Sustainable packaging	66
The future of green packaging	68

Chapter 3 Supply chain efficiency 74

Summary	74
Introduction	74
Supply chain efficiency in food and drinks packaging	75
Innovation and NPD	76
Category analysis	77
Regional analysis	79
Packaging material	81
Trends in supply efficient packaging	82
Shelf ready solutions	82
Shelf ready packaging and regulatory issues	87
Packaging that extends shelf life – aseptic packaging	88
Ultra High Temperature (UHT) aseptic packaging - cartons	88
Ultra High Temperature (UHT) aseptic packaging - cans	91
Cold filling aseptic packaging - High Density Polyethylene	92
Cold filling aseptic packaging - PET	93
Aseptic packaging – ready meals	94
Radio Frequency Identification - RFID	94
RFID and regulatory issues	97
The future of supply chain efficient packaging	98

Chapter 4 Food safety packaging 100

Summary	100
Introduction	100
Food safety packaging categorized	102
Tamper evident	102
Bubble tops and vacuum seals	103
Shrink-sleeves	104
Special membranes	105
Breakaway/tearaway closures	107
Overseals	108
Paper-based seals	108
Contamination prevention	110
Food safety packaging and regulatory issues	114
The future of food safety packaging	115

Chapter 5 Convenient packaging 118

Summary	118
Introduction	118
Convenient consumption	119
Demographic shifts	119
Smaller households	119
Increasing numbers of women working	120
Families leading more fragmented lives	120
Increased income levels	121
Innovation and NPD	121
Category analysis	122
Regional analysis	125
Packaging material	126
Trends in convenient packaging	129
Easy handling packaging	129
Easy open packaging	129
Easy to hold	132
Ergonomic design	133
Transportable packaging	134
Lunch box friendly packaging	136
‘On-the-go’ meal replacement	138
Convenient storage solutions	141
Convenient preparation	142
Microwaveable packaging formats	142
Self-heating and self-cooling packs	148
Packaging that adds ingredients at time of consumption	151
Single portions	153

Regulatory issues	155
The future of convenient consumption packaging	155
Chapter 6	New materials
	158
Summary	158
Introduction	158
What are the newest materials on the market?	159
Nanocomposites and nanofilms	159
Natural polymers and films	163
Oxydegradable additives	165
Edible coatings and films	166
Chapter 7	Conclusions
	170
Summary	170
Introduction	170
Market influences	171
Ethical concerns	171
Rising affluence	171
Food safety	171
Health and wellbeing	172
Market opportunities	172
Ethical marketing	172
Convenience	173
Shelf stable packaging	174
Index	175
