

Navigating Health Claim Regulation in Food and Drinks

Making substantiated claims in a changing regulatory environment

By Piers Berezai

Piers Berezai

Piers is an independent Market Analyst & Consultant who has over a decade of experience in the market analysis and research industry. His independent work and his nine years working for Datamonitor Plc have given Piers extensive experience in the management and execution of qualitative and quantitative research. He has worked with many of the leading companies in the Consumer Packaged Goods industry in both Europe and North America, with a focus on the manufacturing, marketing, distribution and retailing of grocery products. His technical skills cover analysis of consumer trends and insights, market segmentation and sizing, market forecasting and product innovation tracking and analysis. Piers has a particular interest in the development of behavioral frameworks of consumer trends and combining this with audience segmentation in order to future-proof marketing strategies and product portfolios. Piers holds an MA from Cambridge University.

Table of Contents

Navigating Health Claim Regulation in Food and Drinks

Executive Summary		10
Consumer attitudes		11
Claims & corporate strategy		12
Marketing strategy		13
Product claims strategy		14
Chapter 1	The impact of new legislation	16
Summary		16
Introduction		17
	The new legislation will have a dramatic effect on the marketing landscape	17
Overview of regulation # 1924/2006		18
Introduction		18
	The creation of stronger, clearer regulation	18
	A “gold standard” approach is proving controversial	18
Definitions and scope of the regulation		19
	Definition of “food”	19
	Definition of nutritional and health claims	20
	Medicinal claims are beyond the scope of this regulation	21
Articles 13, 13.5 and 14 – the heart of the regulation		22
	Article 13	22
	Article 13.5	23
	Article 14	23
Problems with the implementation of the regulation		23
	Communication breakdown? Dossier insufficiencies and related problems	24
	Interpretation of Article 13 and the “Gold Standard” approach	25
	A need within a defined population must also be shown for a health claim	27
	The costs of dossier compilation are harming innovation budgets	27
	Direct challenges to EFSA’s opinions are risky and ignore the wider context	28
Challenges the food and drinks industry must meet		29

The future impact of the regulation	31
Conclusions	32
The rationalization, and not the death, of nutrition and health claims	32
A narrow focus on the regulation will miss a vital piece of the marketing puzzle	33

Chapter 2 Consumer attitudes 36

Summary	36
Introduction	37
A need to address the latest consumer trends affecting the market	37
Addressing consumer issues can lead to major rewards	38
A note on the following sections	38
A major trust issue needs addressing	39
Mistrust is the number 1 inhibitor of continued growth	39
The majority of consumers still need convincing before they will buy products	40
An independent expert approving claims is crucial	40
Functional foods are favored over other food technologies	41
Clear benefits and low risk make functional foods more acceptable to consumers	41
The media and governments play a fundamental role in shaping consumers' views	41
Regulation and corporate practices need to build trust	42
A lack of consumer control creates a clear need for regulation	42
Consumer understanding needs to be improved	43
Areas of misunderstanding	43
Claims should be concise and clear to avoid confusion	44
Deep-seated food attitudes affect the marketing landscape	45
Introduction	45
The process of food attitude formation	46
Steps to determining attitudes and behaviors in a category	46
“Natural” products must also fit in with these attitudes	48
As a result, some ingredients are seen as more natural than others	49
The carrier food for any ingredient is crucial	49
A logical connection between the carrier and ingredient is required	49
Staples, and products already seen as “healthy”, make the best carriers	49
Risk-Benefit assessments	50
The prominence of “risk” in consumers' minds	50
What are the risks on which consumers need assurances?	50
Education about regulation can help provide reassurances	50
Differences by consumer groups	51
Attitude towards the product is the key	51
Demographic factors to augment attitudinal segmentation	52

Attitude-Behavior discrepancies	53
Research needs taking into context – consumer research can be misleading	53
Price and taste remain more important than claims	53
Claims are important, but the “golden rules” cannot be ignored	53
Conclusions	55
A tough recipe for success	55

Chapter 3 Claims & corporate strategy 58

Summary	58
A need to update current strategies	59
Health-orientated businesses should re-examine strategies	59
Companies which simply wait upon EFSA’s decisions will fall behind	59
It’s not just a case of “carrying on as usual” once a claim has been approved	60
Areas that should be strategically reassessed	61
Decisions to challenge EFSA will harm companies and industry in the long run	61
Research & development needs to focus on clinical excellence and “marketability”	62
Product pipelines and portfolios should be reassessed	63
Next steps in corporate strategy	64
Avoid distractions associated with the new regulation	64
Adopting a pharmaceutical-style model for health brands	65
Developing a corporate health brand	67
Case study: Danone, developing a corporate health brand	67
New approaches in portfolio management	69
All health brands in the market need to offer highly credible health claims	69
Research and development pipelines should be segmented by risk	69
Where possible, make use of “stalking horses” when launching new ingredients	71
Conclusions	72

Chapter 4 Marketing strategy 76

Summary	76
Introduction	77
The advantage will go to those who are quick to update their marketing	77
A framework for marketing strategy	78

Strategies can, and should, be based on consumer insight	78
A tool for assessing products' consumer appeal	79
Assessments of product appeal should be based upon consumer insights	79
Market analysis can also be layered on top of consumer appeal assessments	81
Marketing strategy and tactics	82
Make claims clear, specific and benefit-focused	83
The temptation to continually add claims should be avoided	85
Wellness positionings should also be avoided for specific products	86
Market benefits first and provide the science as back up	86
Naming specific ingredients is a powerful tool in marketing communications	88
Safety of products is a tricky issue	89
Marketing should reassure consumers about safety	89
Improving communications	90
Commercializing science and educating consumers are key	90
A flexible blueprint for global marketing is crucial	91
Companies must take the lead in responsible communications	93
The Natural Perspective	95
Natural positioning should be used where possible	95
Determining just what is "natural" is not an easy task	95
Natural positionings must meet consumers' expectations as well as regulation	96
New "natural" sweeteners highlight the power of a natural positioning	97
Marketers will need to decide how overt to make any natural positioning	98
Conclusions	99

Chapter 5 Product claims strategy 102

Summary	102
Introduction	103
Scope of the chapter	103
Analyzing the last year of new launches provides insight into latest strategies	103
Scope of the data	104
Claims analysis	106
Claims by type and by industry	106
An average of 2.6 claims is made by a product making any claim	106
Beverages focus on "positive" nutrition, but food focuses on avoiding the "bads"	107
Innovation is greater in North America and is more focused on positive nutrition	107
Why should positive nutrition be more popular in the US?	108

Most popular claims by industry	109
“High”, “low” and “no” positioning still dominate	109
The natural angle	111
Natural positionings are of fundamental importance	111
American products heavily focus on natural benefits	112
Most popular functional claims by industry	113
Most functional claims are not specific	113
Functional claims are much more prevalent among North American launches	114
Leading countries for new claims	115
Leading manufacturers for new claims	116
Private Labels are providing competition to brands	116
Conclusions	118

Chapter 6 Appendix 122
