

Carbon Management in Emerging Economies

New mechanisms for managing carbon dioxide emissions

By Professor Merlin Stone

Professor Merlin Stone

Merlin is Research Director at WCL, where his recent research projects include work on smart metering, customer empowerment in the public sector, and customer retention during the recession. He is author or co-author of many articles and thirty books and also on the editorial advisory boards of several academic journals. He has a first class honors degree and doctorate in economics from Sussex University, UK. In parallel to his business career, he has also pursued a full academic career, holding senior posts at various universities. He is now a visiting professor at De Montfort, Oxford Brookes and Portsmouth Universities and teaches economics part-time for the Open University.

Table of Contents

Carbon Management in Emerging Economies

Executive Summary	12	
What Carbon Management is and how it works	12	
Africa	13	
Asia	14	
Latin America	15	
Kazakhstan, Russia and the Ukraine	16	
Conclusions and implications	17	
Chapter 1	What carbon management is and how it works	20
Summary		20
Introduction		21
Definition of carbon management		22
Emerging countries and their current and future contribution to carbon emissions		22
Countries covered in this report		24
Side benefits		25
The principles of carbon management		26
The capacity issue		26
The Clean Development Mechanism		26
Industry targets		29
National targets		29
Carbon trading and carbon markets		30
The cap and trade approach		33
Voluntary and mandatory trading		34
The experience of trading		36
Taxation, subsidies, regulation and other methods		39
Capacity building		40

Power access and theft	98
Carbon market	99
CDM projects	99
Forestry	100
Biomass	101
Iron and steel	101
Energy efficiency in industry	102
Rail transport	103
Tata Group	103
Indonesia	104
Emission levels	104
Commitments	105
Forestry	106
Public disclosure programme	106
Iran	106
Emission levels	106
Commitments	108
Carbon storage	108
Clean development	108
Malaysia	109
Emission levels	109
Commitments	110
Research	110
Pakistan	111
Emission levels	111
Commitments	112
Forestry	113
Fertilizers	113
Turkey	113
Emission levels	113
Commitments	115
Wind power	115
Buildings	115
Asia: conclusions and the future	116

Chapter 4 Latin America 118

Summary	118
Introduction	119
Argentina	119
Emission levels	119
Commitments	120
Power usage	120
Buildings	121

Landfill	121
Other activities	121
Brazil	122
Emission levels	122
Commitments	123
Forestry	124
Energy use	124
CDM	125
Cattle ranching	125
Chile	126
Emissions levels	126
Commitments	127
Coal-fired power	128
Renewable energy	128
Columbia	129
Emission levels	129
Commitments	130
Wind power	130
Mexico	131
Emission levels	131
Commitments	132
Power use	132
Wind power	134
Oil and gas	134
Transport	135
Agriculture and forestry	136
Other emission reduction opportunities	138
Venezuela	139
Emission levels	139
Commitments	140
Forestry	140
Renewable energy	141
Energy efficiency	142
Coal	142
Transport	142
Mobile phones	142
Latin America: conclusions and the future	143

Chapter 5	Kazakhstan, Russia and the Ukraine	146
Summary		146
Introduction		147

Kazakhstan	147
Emission levels	147
Commitments	149
Resources	149
Future participation in carbon markets	149
Russian Federation	150
Emission levels	150
Commitments	151
Carbon trading	151
Oil and gas	152
Forestry	154
Ukraine	155
Emission levels	155
Commitments	157
Energy use	157
Buildings	157
Manufacturing industry	159
Steel industry	160
Agriculture	161
Nuclear energy	161
Landfill	161
Kazakhstan, Russia and Ukraine: conclusions and the future	162

Chapter 6 Conclusions, implications and the future 164

Summary	164
Introduction	164
Organization and management	165
The future	167

Appendix 169

Glossary	169
Index	172

List of Figures

Figure 1.1:	Annual net flux of carbon to the atmosphere from land-use change (Tg C), 2005	24
Figure 2.2:	Africa, CO ₂ emissions levels (thousand metric tons of carbon), 2010	55
Figure 2.3:	Algeria, CO ₂ emissions levels (thousand metric tons of carbon), 2010	59
Figure 2.4:	Egypt, CO ₂ emissions levels (thousand metric tons of carbon), 2010	62
Figure 3.5:	India, CO ₂ emissions levels (thousand metric tons of carbon), 2010	95
Figure 3.6:	Indonesia, CO ₂ emissions levels (thousand metric tons of carbon), 2010	105
Figure 3.7:	Iran, CO ₂ emissions levels (thousand metric tons of carbon), 2010	107
Figure 3.8:	Malaysia, CO ₂ emissions levels (thousand metric tons of carbon), 2010	110
Figure 3.9:	Turkey, CO ₂ emissions levels (thousand metric tons of carbon), 2010	114
Figure 4.10:	Argentina, CO ₂ emissions levels (thousand metric tons of carbon), 2010	120
Figure 4.11:	Chile, CO ₂ emissions levels (thousand metric tons of carbon), 2010	127
Figure 4.12:	Colombia, CO ₂ emissions levels (thousand metric tons of carbon), 2010	130
Figure 4.13:	Mexico, CO ₂ emissions levels (thousand metric tons of carbon), 2010	132
Figure 4.14:	Venezuela, CO ₂ emissions levels (thousand metric tons of carbon), 2010	140
Figure 5.15:	Kazakhstan, CO ₂ emissions levels (thousand metric tons of carbon), 2010	148
Figure 5.16:	Russia, CO ₂ emissions levels (thousand metric tons of carbon), 2010	151
Figure 5.17:	Ukraine, CO ₂ emissions levels (thousand metric tons of carbon), 2010	156
